Company Introduction

Daqida Manufacturer is located in Yiwu, known worldwide as the Capital of Small Commodities in China. We have more than 10 years of experience in product R&D, production and export trade. Our factory covers over 5,000 square meters with more than 100 full-time employees. We focus on product structural design, innovation and upgrading, manufacturing, customized production and wholesale.

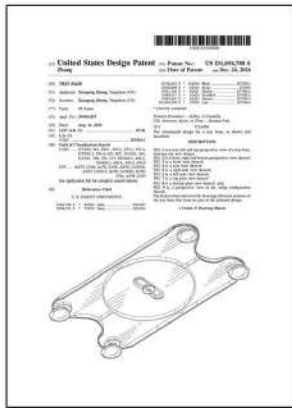

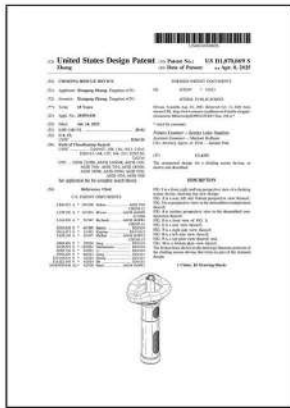

Our product range covers plastic goods, hardware products, medical devices, household articles and more. Our clients come from North America, Europe, South America, Southeast Asia, the Middle East, Russia, Africa and other global regions. We maintain in-depth cooperation with mainstream cross-border platforms including Amazon, Temu, Shein, eBay, Walmart, TikTok, Alibaba, Mercado Libre and independent websites.

We hold over 100 product patents, which help stabilize market prices and secure steady profits for our partners. Equipped with complete production lines for injection molding, blow molding, stamping and lathe processing, we support small-batch customization for OEM, ODM and OBM orders. We supply high-quality products and personalized solutions to help partners strengthen brand competitiveness.

Our daily output exceeds 20,000 sets. We provide efficient customized services: samples ready within 1 day and goods delivered within 3 days, to speed up product iteration. We possess a full set of production licenses, product test reports and qualification certificates. We can provide international certifications such as FDA and CE for overseas clients, so you can expand your business with complete peace of mind. We take innovative manufacturing as our core competitiveness.

Supported by refined production processes and patented technologies, we have expanded our business across multiple countries, with business volume growing steadily year after year. We are now a reliable and outstanding manufacturer in China with strong independent R&D capabilities. Upholding the philosophy of continuous innovation, standardized workflows, high efficiency and win-win cooperation, we strive to deliver solid support to every partner. Warmly welcome all inquiries and cooperation opportunities!
